Food Grade Moisture Analyzer

**NIR-6100**

# THE NEW NIR-6100

Sensortech is proud to announce the anticipated debut of the new NIR-6100 Food Grade Moisture Analyzer. The new design bolsters the strengths of the original model and incorporates features drawn from our engineering group, industry partners and feedback from our valued customer base.

## HYGIENIC ONLINE ANALYZER

The NIR 6100 Series of Online IR Moisture Analyzers are designed for food grade applications. The #316 Stainless Steel surface provides additional protection from corrosion and largely eliminates the risk of abrasion and issues related to the porous nature of standard metallic enclosures. Its IP67 rating allows rigorous wash-downs and promotes a high level of protection from contamination, bacteria, and other hazards typically associated with food processing.

### *Non-Contact Sensor Provides Noninvasive Measurements in Real-Time*

It is ideally suited for food processors concerned about regulatory compliance or simply wanting a higher standard for their manufacturing process. The non-contact characteristic of Sensortech's IR Series reinforces your processes standard of cleanliness and hygiene while maximizing productivity by reducing downtime with its maintenance-free operation. The NIR 6100 bridges the gap between productivity and health code compliance.

## HARSH ENVIRONMENTS

The NIR-6100 Food Grade Analyzer is an ideal solution for food processors operating in high temperature environments. The stainless steel enclosure provides the highest level of protection essential to food grade applications. The IP67 rating permits the analyzer to operate in environments having excessive debris where the feasibility of performance of conventional analyzers are limited.

## SENSORTECH GUARANTEE

Sensortech Systems, Inc. has been the trusted name in moisture measurement and control for over 35 years. Whether you are a first time customer or have been a client for over 30 years you can be assured that Sensortech's commitment to customer satisfaction is still our highest priority. Our reputation for customer support has been built with superior quality instruments and the unmatched support that compliments their performance.
